Preparing the activity

Bees for the future

Prepare the research platform:

1. Sign up – Go to http://graasp.eu/, click on “sign up” and introduce your data.
2. Check your e-mail and click on the link to activate your account
3. Go to: https://www.golabz.eu/ils/humans-and-bees
4. Click preview to see what the platform will look like for your students
5. Go back to: https://www.golabz.eu/ils/humans-and-bees
6. Click “duplicate space”
7. The system will generate a copy that will be yours and you will access the “backstage” of the activity.
8. Make all the changes that you want, if you want.
9. On the top right of the screen you will see the “share” button

10. Click on the button an then on “Show standalone view”
11. This will be the link you will share with your students.

Note: your students should introduce their names and in the backstage, you will be able to see exactly what each students/group does in the platform and leave them real-time comments and feedback.

You can find more information here: http://support.golabz.eu/

Prepare the OSOS project (considering that you have already registered in the OSOS portal)

1. Visit the project: http://portal.opendiscoveryspace.eu/en/osos-project/bees-future-851083
2. In the end of the page click on “view project” to see all the phases of the project.
3. Go back to: http://portal.opendiscoveryspace.eu/en/osos-project/bees-future-851083
4. At the bottom o the page, select “copy” and in the dialog box choose to copy to “Islands Diversity for Science Education”
5. You will see a copy of the project that will be yours.

6. Create as many copies as student groups working in your class (if you want you can create a copy for each student)
7. In the bottom of the page click on “share”
8. The link and the code are the information you need to share with your students (it will be different for all the copies you create)

Working on the project

- With the link and code that you gave them, your students will access a login page. Each group/student will choose a login name and a password that should be saved somewhere to be reused.
- Make sure that your students register all this information so that they can return to their project anytime they want.

Attention: students don’t register on the portal like you! They make their login only through their project as explained above.

- When your students open their project, they will see all the guidelines repeated. Ask them to erase all the text from the editable description box as this will be their working place.

- Students should read all the instructions in each phase and spread their creativity in creating their own projects.

Note: In the description of the activity, your students will find the option and putting the project as “draft” or “final”. This is meant for them to choose. During their work they should keep their projects as drafts. When they finalize all their work, with your approval, they can set it as final.

See what your students are doing and give them feedback!

- To return to the students’ projects, login in the OSOS portal:

http://portal.opendiscoveryspace.eu/en/osos;

- Click on your name on the top right corner

- At the end of the page click on “projects” and choose the one you want to see.

- To see the project, click on “view project”

- To give feedback to students, instead of clicking on “view project” click on “edit”. You will find a specific space for “feedback” and your students will see what you wrote from their own side of the project.

If you have any doubt, don’t hesitate to contact us through: info@idiverse.eu.
