

METER, METER ON THE FLOOR, WHO IS THE MOST SEISMIC OF THEM ALL?

Earthquakes are no strangers to your island. Some may have been monumental but many others went unnoticed. How active is your region really?

Your challenge is to learn about the science behind earthquakes, find out how many earthquakes have occurred near your island in the year 2019 and make an earthquake profile for your island.

THE TRAIL OF ISLANDS

THE VOLCANO IN MY BACKYARD

Volcanoes are among nature's most fierce features. They can be deadly and bring devastation across the globe with a single eruption. They are also a source of rebirth for Earth causing new lands to emerge. your island is a living example!

Your challenge is to acquaint yourselves with the nature and characteristics of volcanoes, and then make a brief presentation of the volcano in your backyard.

THE TRAIL OF ISLANDS
